

Cine Battery

- ◆ The new developed 26V Li-ion battery is specially designed for the high voltage film cameras like Arri Alexa or Phantom series and other equipments that also require high voltage.
- ◆ The battery is featured “high discharge rate” which can withstand very high levels of current without damaging the cells.
- ◆ Due to the high drain properties, it has proved to be more robust than conventional li-ion battery packs in terms of life cycles when exposed to high duties.
- ◆ Compared to the traditional 14.4V li-ion batteries, the 26V Li-ion battery is not affected by high current so the lifespan is greatly increased.

#:LH-230 Li-ion Battery High Power Battery

Voltage : 26V
Wattage: 200W
Capacity : 230Wh/8.7Ah
Max Output Current : 30A
Max Input current : 5A
Operation temperature: -30°C~+50°C
Net Weight : Approx 1.20Kg
Dimension : 164x90.3x63.4mm

LH-230 A-Pack:Gold Mount

LH-230 V-Pack:V-Mount

#:LHC-230 Charger

Charge the LH-230 battery in approximately 90 mins
Input:AC 90V~240V/47Hz~63Hz
Charger Output:DC 29.2V/5A
Operation temperature: -10°C~+35°C
Net Weight : Approx 1.40kg
Dimension : 320×90×70mm

LHC-2A for LH-230 A-Pack(Gold Mount)

LHC-2S for LH-230 V-Pack(V-Mount)
